General information • Informaciones generales

Boring Pattern - 100/200 series - S series Face Frame

K = Boring distance from the edge of the door:

94°	3 to 9 mm
105°	3 to 6 mm
106°	2.5 mm (Face Frame)
110°	3 to 6 mm
120°	3 to 6 mm
155°	3 to 9 mm
165°	3 to 8 mm

Screw-in.
Tornillo para madera.

Tablas taladro - Serie 100/200 - Serie S para marco

K = Distancia taladro del borde de la puerta:

94°	3 a 9 mm
105°	3 to 6 mm
106°	2.5 mm (Face Frame)
110°	3 a 6 mm
120°	3 a 6 mm
155°	3 a 9 mm
165°	3 a 8 mm

Press-in - Rapido - Logica
Taco - Rápido - Lógica

System 37x 32 standard drilling for cruciform plates

Taladro estándar sistema 37x 32 para bases en cruz

Recommended number of hinges per door.

Maximum door weight.

ø 40 mm	20lb	40lb	60lb
ø 35 mm	20lb	40lb	60lb
No. of hinges	2	3	4

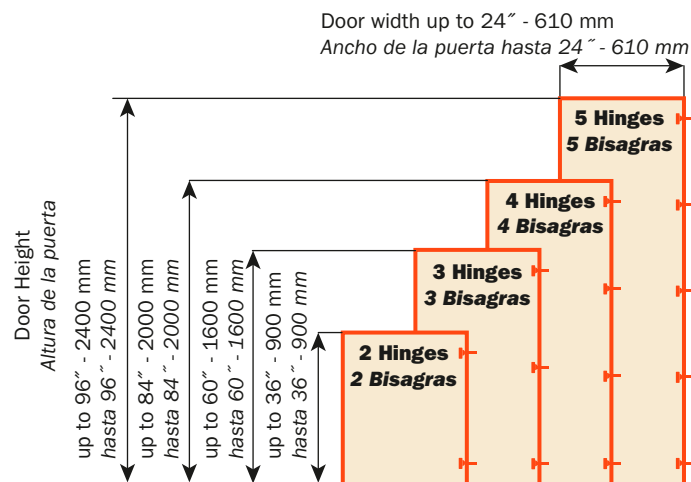

The number of hinges required depends on the size, weight and material of the door. The distance between the top and bottom must be greater than the width of the door. Additional hinges should be added if doors are near the border line of size or weight chart. Use the diagram below to determine number of hinges needed.

Número de bisagras aconsejado por cada puerta.

Peso máximo de la puerta.

ø 40 mm	20lb	40lb	60lb
ø 35 mm	20lb	40lb	60lb
Número de bisagras	2	3	4

Número de bisagras aconsejado por cada puerta.
El número de bisagras requerido depende de las medidas, peso y calidad de la puerta. La distancia entre la parte superior e inferior tiene que ser mayor respecto a la anchura de la puerta. Las bisagras adicionales deben de ser añadidas si las puertas están cerca de los límites de la tabla de medidas y peso. Use el diagrama inferior para determinar el número de bisagras necesarias.

Millimeter to inch equivalents - Correspondencia entre pulgadas y milímetros

mm	1	1.5	2	3	4	5	5.5	6	7	8	9	9.5	10	11	12	13

**How to calculate your overlay using the 100/200 series:
Como calcular su cobertura Serie 100/200:**

Full overlay hinge.
"A" Crank.
 $D = (15 + K) - H$

Bisagra cobertura total.
Codo "A".
 $D = (15 + K) - H$

1/2" overlay face frame hinge.
"D" Crank.
 $D = (10 + K) - H$

Bisagra para marco.
Cobertura 1/2"
Codo "D"
 $D = (10 + K) - H$

Half overlay hinge.
"G" Crank.
 $D = (6 + K) - H$

Bisagra cobertura parcial.
Codo "G".
 $D = (6 + K) - H$

Inset door hinge.
"P" Crank.
 $H = (-2 + K) + A$

Bisagra puerta interna.
Codo "P".
 $H = (-2 + K) + A$

Overlay = (constant + drilling distance) - plate height.
For special applications, do not hesitate to contact our customer service department.

Cobertura = (constante + distancia taladro) - altura base.
Para aplicaciones especiales contactar nuestro servicio asistencia clientes.

Boring Pattern - F series - Tablas taladro - Serie F

**How to calculate your overlay:
Como calcular su cobertura:**

Boring distance from the edge of the door: 3 mm - 15 mm:
94° opening
Screw-in.

Distancia taladro del borde de la puerta 3 mm - 15 mm:
Abertura 94°
Tornillo para madera.

Full overlay hinge.
"A" Crank.
 $D = (19 + K) - H$

Bisagra cobertura total.
Codo "A".
 $D = (19 + K) - H$

Half overlay hinge.
"G" Crank.
 $D = (8 + K) - H$

Bisagra cobertura parcial.
Codo "G".
 $D = (8 + K) - H$

Inset door hinge.
"P" Crank.
 $H = (-3 + K) + A$

Bisagra puerta interna.
Codo "P".
 $H = (-3 + K) + A$

Abbreviations • Abreviaciones

Application with full overlay door.
 Aplicación con puerta externa.

- S** = Thickness of the cabinet side - *Espesor del lateral*
- D** = Required door overlay - *Cobertura de la puerta sobre el lateral*
- T** = Door thickness - *Espesor máx. de la puerta*
- K** = Drilling distance
Distancia entre el borde externo de la puerta y el agujero para la cazoleta de la bisagra
- A** = Reveal - *Parte no cubierta del lateral*
- L** = Gap between door and cabinet - *Distancia interna entre puerta y frente externo del lateral*
- H** = Height of the mounting plate - *Altura de la base*
- G** = Hinge constant - *Característica de la bisagra*

Whatever door overlay is required, you can select from our series the combination of both the type of hinge arm and the thickness of mounting plate necessary to solve your construction problem while avoiding the need to stock unnecessary components.

Cualquiera que sea la cobertura de la puerta sobre el lateral requerida, pueden contar con una amplia gama de brazos rectos, con codo y de alturas de bases, que les permiten obtener la construcción deseada, administrando de modo racional su almacén.

Application with half overlay door.
 Aplicación con puertas dobles.

Application with inset door.
 Aplicación con puerta interna.

- S** = Thickness of the cabinet side - *Espesor del lateral*
- T** = Door thickness - *Espesor máx. de la puerta*
- K** = Drilling distance - *Distancia entre el borde externo de la puerta y el agujero para la cazoleta de la bisagra*
- A** = Reveal - *Parte no cubierta del lateral*
- L** = Gap between internal face of door and internal cabinet elements (e.g. shelves, drawers, etc.)
Distancia interna entre puerta y elementos al interior del mueble (cajones, repisas, etc.)
- H** = Height of the mounting plate - *Altura de la base*
- G** = Hinge constant - *Característica de la bisagra*

Whatever door overlay is required, you can select from our series the combination of both the type of hinge arm and the thickness of mounting plate necessary to solve your construction problem while avoiding the need to stock unnecessary components.

Cualquiera que sea la cobertura de la puerta sobre el lateral requerida, pueden contar con una amplia gama de brazos rectos, con codo y de alturas de bases, que les permiten obtener la construcción deseada, administrando de modo racional su almacén.

Height adjustment • Please use #2 Pozidrive screwdriver for all screws

Regulación vertical • Utilizar un destornillador Pozidrive n°2 para todos los tornillos

Traditional height adjustment.

By loosening the two fixing screws it is possible to adjust the door vertically by ± 2 mm. The elongated holes allow the mounting plate to slide freely in both directions. The screws must be retightened.

Regulación vertical tradicional.

Afrojando los dos tornillos de fijación es posible regular verticalmente la puerta a ± 2 mm. Los orificios ovales permiten el desplazamiento de la base en los dos sentidos. Finalizada la operación, los tornillos deben ser nuevamente ajustados.

Height adjustment with Domi snap-on mounting plates, model BARxR.

Height adjustment is made without loosening any screws. The door can be moved vertically ± 2 mm simply by rotating the cam adjuster incorporated in this series of mounting plates.

Regulación vertical con bases Domi de enganche rápido, modelos BARxR

Es posible regular verticalmente la puerta a ± 2 mm mediante un excéntrico incorporado en éstos modelos de bases, sin tener que aflojar ningún tornillo.

Height adjustment by cam • Regulación vertical mediante excéntrico.

Height adjustment with DOMI snap-on mounting plates, model BAPxR.

Height adjustment is made without loosening any screws. The door can be moved vertically ± 2 mm simply by rotating the cam adjuster incorporated in this series of mounting plates.

Regulación vertical con bases Domi de enganche rápido, modelos BARxR

Es posible regular verticalmente la puerta a ± 2 mm mediante un excéntrico incorporado en éstos modelos de bases, sin tener que aflojar ningún tornillo.

Height adjustment by cam. • Regulación vertical mediante excéntrico.

Depth adjustment • Please use #2 Pozidrive screwdriver for all screws

Regulación frontal • Utilizar un destornillador Pozidrive n°2 para todos los tornillos

Traditional depth adjustment.

The hinge fixing screw is loosened and a key hole on the arm of the hinge enables the door to be adjusted out by +2.8 mm. The fixing screw must be retightened.

Regulación frontal tradicional.

Es posible regular frontalmente la puerta a +2.8 mm. El orificio oval permite el desplazamiento frontal de la bisagra. Finalizada la operación, el tornillo debe ser nuevamente ajustado.

Depth adjustment with DOMI® snap-on mounting plates model BARxR.

Frontal adjustment is made without loosening any screws. The door can be moved frontally from -0.5 to +2.8 mm simply by rotating the cam adjuster in this series of mounting plates.

Regulación frontal con bases DOMI® enganche rápido modelos BARxR.

Es posible regular frontalmente la puerta desde -0.5 mm hasta +2.8 mm mediante un excéntrico, sin tener que aflojar ningún tornillo.

Depth adjustment by cam. • Regulación frontal mediante excéntrico.

Depth adjustment with DOMI® snap-on mounting plates model BAPxR.

Frontal adjustment is made without loosening any screws. The door can be moved frontally from -0.5 to +2.8 mm simply by rotating the cam adjuster in this series of mounting plates.

Regulación frontal con bases DOMI® enganche rápido modelos BAPxR.

Es posible regular frontalmente la puerta desde -0.5 mm hasta +2.8 mm mediante un excéntrico, sin tener que aflojar ningún tornillo.

Side adjustments • Please use #2 Pozidrive screwdriver for all screws

Regulaciones lateral • Utilizar un destornillador Pozidrive n° 2 para todos los tornillos

Side to side adjustment of the door with 100, 200, F and B series hinges.

Regulación lateral de la puerta con bisagras 100 series, 200, F y B.

An ingenious adjustment system allows the door to be moved laterally without changing the gap behind the door (the "L" value of 1.5 mm remains constant).

Compensating side adjustment. A patented system exclusive to all Salice 100, 200, F and B series hinges.

Una técnica especial de regulación permite un desplazamiento lateral de la puerta manteniendo inalterado el valor de "L" = 1.5 mm.

Regulación lateral compensada. Un sistema exclusivo patentado en todas las bisagras Salice de las 100 series, 200, F y B.

**-1.5 +4.5 mm (100, 200, and series B / serie 100, 200 y B)
-0.5 +5.5 mm (F series/ serie F)**

The adjustment screw operates in conjunction with the inner leaf of the hinge arm. The door moves in only one plane - parallel to the carcass while maintaining a consistent "L" value or gap between the door and the carcass. No further adjustments are required since there is no gap change.

*El tornillo de regulación actúa haciendo adelantar el brazo de la bisagra.
La puerta se desplaza respecto al lateral evitando su separación.
No son necesarias ulteriores operaciones de ajuste.*

Assembly instructions

100, 200, F and B series

Instrucciones de montaje

100 series, 200, F y B

Assembly with 200 series traditional mounting plates.

Montaje tradicional con bases Serie 200.

- 1** Place the hinge onto the mounting plate.
Push the hinge up to the pre-determined stop under the hinge arm.

*Introducir la bisagra sobre la base.
Posicionamiento con fin de carrera preestablecido.*

- 2** Tighten the fixing screw.

Apretar el tornillo de fijación.

- 3** An «L» value of 1.5 mm between door and cabinet side is achieved on final assembly.

Con el montaje terminado entre puerta y lateral hay una «L» de 1.5 mm.

- 4** "Key hole" safety feature.

Enganche de seguridad.

- 1** Locate the lugs on the mounting plate into the "J" hooks beneath the arm.

Contactar los dos puntos como indica la flecha.

- 2** Gently rotate the hinge arm in the direction shown.

Imprimir una rotación.

- 3** Then press lightly on the end of the arm to engage the catch.

Ejercer una ligera presión.

- 4** To remove the hinge from the mounting plate, press gently in the places shown by the arrows.

Para desenganchar la bisagra de la base, ejercer una presión en los puntos indicados.

Hinges • Bisagras

100 series • Hinges for thin doors (1/2") or doors with deep profiles - 105°
Serie 100 • Bisagras para puertas ligeras (1/2") o puertas con perfiles profundos - 105°

S2A637XF 86° Reduction clip.

The reduction in the opening prevents the collision of doors against walls and other obstacles. (see pag 57)

S2A637XF 86° Tope de abertura.

La reducción en abertura previene la colisión de las puertas contra paredes y otros obstáculos. (ver pàg 57)

200 series • For thicker doors - 155° • K Series, zero protrusion, wide angle
Serie 200 • Para puertas de gran espesor - 155° • Serie K, gran ángulo de abertura

S/C = Self-closing
 S/C = cierre automático

	155° ø35	Packaging Embalaje
		

S/C		C2PKA99	100
S/C		C2RKA99	100

For pull out shelf application, total door clearance (zero protrusion) begins at 90° opening.
 Full overlay (19 mm - 3/4") application only. 0 mm to 6 mm plates only.

Para aplicaciones con elementos extraíbles, alejamiento de la puerta ya a 90° de abertura.
 Solamente aplicación (19 mm 3/4") con cobertura total. Utilizar solamente bases de 0 mm a 6 mm.

S/C		C2PKD99	100
S/C		C2RKD99	100

For thick doors up to 28 mm (1- 1/8") 8 mm deep metal cup, possible drilling distance on the door (K); from 3 to 9 mm

S/C		C2PKG99	100
S/C		C2RKG99	100

For full overlay doors up to 1- 1/8" thick, choose one of the following solutions, K=8
 Arm "A" + 6 mm plate + adjustment
 - or -
 Arm "D" + 0 mm plate + adjustment

Para puertas de gran espesor, hasta 28 mm (1- 1/8"), profundidad de la cazoleta metálica 8 mm, posibilidad de taladro de la puerta (K) desde 3 hasta 9 mm.

S2BF37XY 110° Reduction clip
S2AF37X3 125° Reduction clip

Reduction clip can be used to allow the increase of drilling distance and overlay. The reduction in the opening allows the turning of thicker doors. (see pag. 57)

S2BF37XY 110° Tope de abertura
S2AF37X3 125° Tope de abertura

El tope de abertura puede ser utilizado para aumentar la distancia de taladro y la cobertura. La reducción en abertura permite la rotación de puertas de gran espesor. (ver pàg. 57)

Para puertas de espesor hasta 1- 1/8" con cobertura total, elegir una de las soluciones siguientes, K=8
 codo "A" + base 6 mm + regulación
 o
 codo "D" + base 0 mm + regulación

B series • Hinges with integrated silicone-oil damper for doors with special profiles

Serie B • Bisagras con amortiguador integrado de aceite silicónico para puertas con molduras

Cup depth 9 mm, opening 110° K = 3 to 18 mm (on square edge doors).

Profundidad de la cazoleta 9 mm.
Abertura 110°, K = de 3 a 18 mm.
(en puertas a esquinas vivas)

Abbreviations chart - Abreviaciones:

S = thickness of the cabinet side

Espesor del lateral

D = required door overlay

Cobertura de la puerta sobre el lateral

T = max. door thickness

Espesor máx. de la puerta

K = drilling distance

Distancia entre el borde externo de la puerta y el agujero para la cazoleta de la bisagra

A = reveal

Parte no cubierta del lateral

L = gap between door and carcass

Distancia interna entre puerta y frente externo del lateral

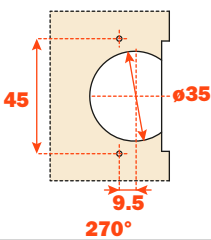

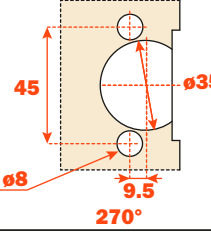

H = height of the mounting plate

Altura de la base

M series • Institutional single pivot hinge • 270° opening
Serie M • Bisagra con perno de rotación • abertura 270°

	
Wood screw Tornillo para madera CMP3A99 	P
	
Dowel Taco CMR3A99 	R

Single pivot hinges.
270° opening angle.
Bright nickel plated die-cast cup and arm.
Integrated stay close feature.

Ideal for the most critical applications, where high stability, strength and endurance are required. They are certified for applications in public environments in conformity with FIRA Level 5 and ANSI Grade 1 requirements.

Adjustments.

Side adjustment +3 mm to -3 mm with 3 mm mounting plate, +3 mm to -1 mm with 2 mm mounting plate and +3 mm to -0 mm with a 0 mm mounting plate.
 Height adjustment ±2 mm.
 Depth adjustment with 200 series traditional mounting plates +2.8 mm.
 Depth adjustment with Domi snap-on mounting plates from -0.5 mm to +2.8 mm.
 Anti-sliding safety stop when using traditional plate.

Mounting plates.

Symmetrical and asymmetrical bright nickel plated steel or die-cast 200 series mounting plates.
 Snap-on assembly on Domi mounting plates.
 Positioning with pre-determined stop on traditional 200 series mounting plates.

IMPORTANT : Use POZIDRIVE No. 2 screwdrivers for all screws.

Bisagra con perno de rotación.
Ángulo de abertura a 270°.
Brazo y cazoleta de zamak níquelado opaco.
Característica de cierre automático integrado.

Ideales para las aplicaciones más críticas, donde es necesaria una gran estabilidad, resistencia y durabilidad. Certificadas para las aplicaciones en ambientes públicos según las normas FIRA nivel 5 y ANSI grado 1.

Regulaciones.

Regulación lateral desde +3 mm hasta -3 mm con base 3 mm, desde +3 mm hasta -1 mm con base 2 mm y desde +3 mm hasta -0 mm con base 0 mm.
 Regulación vertical ±2 mm.
 Regulación frontal con bases Serie 200 +2.8 mm.
 Regulación frontal con bases Domi desde -0.5 hasta +2.8 mm.
 Freno antideslizante de seguridad, utilizando la base tradicional.

Bases.

Bases simétricas y asimétricas de acero o de zamak níquelado opaco de la Serie 200.
 Enganche rápido con bases Domi.
 Posicionamiento con fin de carrera preestablecido con bases tradicionales de la Serie 200.

N.B. Utilizar un destornillador POZIDRIVE n°2 para todos los tornillos.

Packaging - 100 · Embalajes - 100

Use these formulas to determine the height of the mounting plate "H" which is necessary to solve each application problem.

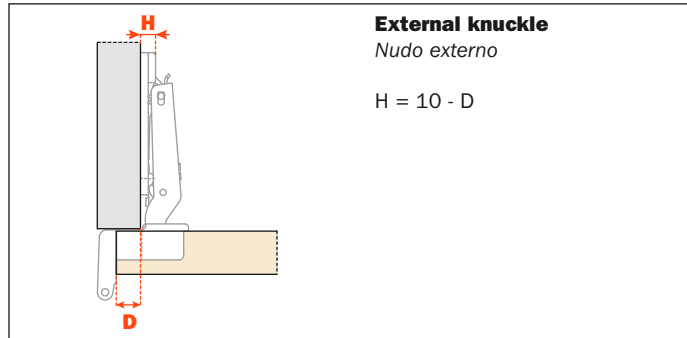

Utilizar estas fórmulas para establecer el tipo de codo de la bisagra, el taladro de la puerta "K" y la altura de la base "H" necesarias para resolver cada problema de aplicación.

Recessed knuckle

Nudo encajado

$H = 18 - D$

External knuckle

Nudo externo

$H = 10 - D$

Use the chart below to verify that full 270° opening is possible.

Full 270° opening is possible only with R value ≥ 0 and mounting plates $H=0$ mm. Otherwise the actual opening must be checked with a practical test.

Utilizar la tabla abajo para verificar que la abertura completa a 270° sea posible.

La abertura a 270° tiene lugar solamente con valor $R \geq 0$ y con bases $H=0$ mm.

En caso contrario, la abertura efectiva tiene que ser verificada con una prueba práctica.

		Door thickness T Espesor puerta T		
		18	19	20
Side thickness S Espesor lateral S	20	2.25	1.25	0.25
	19	3.25	2.25	1.25
	18	4.25	3.25	2.25
R value Valor R				

180° opening with door thickness max. 24 mm.

Abertura a 180° con puertas de espesor máximo 24 mm.

F series • For thick doors up to 1- 1/2" and other special applications

Serie F • Para puertas de gran espesor hasta 1 - 1/2" y otras aplicaciones especiales

	94° ø40	Packaging Embalaje
		

F/S		CFA5A99	300
S/C		CFA7A99	300

This series has been designed to solve unusual application problems. For example, heavy thick doors (inset up to 40 mm) or overlays up to 34 mm. Also, the hinge of choice for pocket door applications.

Cup depth 13 mm, cup diameter 40 mm, opening 94 degrees, K = 3 to 15 mm.

Compensating side adjustment
-0.5 mm +5.5 mm.

F/S		CFA5G99	300
S/C		CFA7G99	300

Este modelo ha sido ideado para resolver problemas de aplicaciones inusuales. Por ejemplo, puertas pesadas de gran espesor (puerta interna hasta 40 mm) o coberturas hasta 34 mm.

Además la bisagra es particularmente adecuada para aplicaciones en puertas corredizas ocultas.

Profundidad de la cazoleta 13 mm, diámetro de la cazoleta 40 mm, abertura 94°, K = desde 3 hasta 15 mm.

Regulación lateral compensada
-0.5 mm +5.5 mm.

F/S		CFA5P99	300
S/C		CFA7P99	300

"C" value

With this formula you can obtain the max. thickness of the moulded door that can be opened without touching adjacent carcase sides, doors or walls, whilst bearing in mind the above L-K-T values.

El contenimiento

Con esta fórmula podeis obtener el espesor máximo de la puerta con moldura abrible sin interferir con los laterales, puertas o paredes adyacentes. También hay que tener presente la tabla de los valores L - K - T.

$$C=22.5 + K + A$$

Overlay charts
Tablas de cobertura

Full Overlay Hinge - Cobertura total

Hinge drilling pattern using "K" of 4 mm
Esquema de taladro utilizando "K" de 4 mm

Full overlay hinge constant = 15 mm
Cobertura total constante = 15 mm
 $D = (15 + K) - H$

The OVERLAY values shown in the table below were calculated by using the following formula:

Required overlay (D) = (Hinge constant of 15 mm plus TAB value (K) minus the plate thickness (H).

Example: $D = (15 + K) - H$ or $19 \text{ mm} = (15 + 4) - 0$

Los valores de la COBERTURA indicados en la tabla abajo han sido calculados utilizando la siguiente fórmula:

Cobertura deseada (D) = (constante de la bisagra 15 mm más el valor de la distancia de taladro (K) menos el espesor de la base (H).

Ejemplo: $D = (15 + K) - H$ o $19 \text{ mm} = (15 + 4) - 0$

Inset - Puerta interna

Inset hinge
constant = -2 mm
Puerta interna
constante = -2 mm

$$H = (-2 + K) + A$$

The OVERLAY values found in the table below were calculated by using the following formula:
Required plate height (H) = (Hinge constant of -2 mm plus TAB value (K) plus the "A" value (Gap).

Example: If a 1 mm gap is desired and drilling at 4 mm, use the formula $H = (-2 + K) + A$. $H = (-2 + 4) + 1$ or $Ht. = 3$ mm.

NA = Not Applicable

Los valores de la COBERTURA indicados en la tabla abajo han sido calculados utilizando la siguiente fórmula:

Altura base deseada (H) = (constante de la bisagra -2 mm más el valor de la distancia de taladro (K) más el valor "A" (parte no cubierta del lateral)

Ejemplo: si se requiere una parte no cubierta del lateral de 1 mm y taladro a 4 mm, utilizar la fórmula

$H = (-2 + K) + A$. $H = (-2 + 4) + 1$ o alt. = 3 mm

NA = no aplicable

To be used with:

- 1) Half overlay hinges ("G" crank)
 - 2) 1/2" overlay hinges ("D" crank) + adjustment.
- Fix with #6 x 5/8" truss head recommended.

A utilizar con:

- 1) Bisagras cobertura parcial (codo "G")
 - 2) Bisagras cobertura 1/2" (codo "D") + regulación.
- Se recomienda la fijación con tornillo #6 x 5/8" de cabeza plana.

Double cam - Rear flange face-frame applications. Excéntrica doble - Para aplicaciones al interior del marco.

	BA03R59	150

Overlay calculation:

Overlay = constant + Drilling distance - 5 mm

This wrap-around mounting plate allows attaching to both the edge of the frame as well as attaching to the back of the frame. It is ideal for many specialized applications that include cabinet refacing when a 1/4" veneer is added to the face of the frame. In this application, this plate design allows the fixing screws to remain in the center of the solid wood frame thus avoiding the joint between the frame and the surfacing material. Some manufacturers do not use solid wood framing material but other materials such as plywood or MDF. Since these materials do not provide suitable screw holding power on the edge of the material, this plate can be secured both to the back surface of the frame and the edge. This results in an acceptable, secure attachment.

Cálculo cobertura:

Cobertura total = constante + distancia taladro - 5 mm

Esta base envolvente permite fijarse tanto al borde del marco como a la parte posterior del marco. Es ideal para muchas aplicaciones especiales que incluyen el revestimiento del mueble cuando se agrega una chapa de 1/4" a la cara del marco. En esta aplicación, este diseño de la base, permite que los tornillos de fijación atornillen en el centro del marco de madera maciza evitando así la unión entre el marco y el material sobrepuesto. Algunos fabricantes no utilizan material de madera maciza, sino otros materiales como madera contrachapada o MDF. Dado que estos materiales no ofrecen un poder de sujeción de tornillo adecuado en el borde del material, esta base se puede fijar tanto a la superficie posterior del marco como al borde. Esto da, como resultado, una fijación aceptable y segura.

Double cam - Large overlay face-frame applications. Excéntrica doble = Para aplicaciones al interior del marco.

Guía de selección de bisagra y base para aplicaciones internas para marco.

BAR_ mounting plate

BAR_ Base

P_ crank inset hinge

P_ codo bisagra para
puertas internas

Face frame cabinets

The **BAR** thick mounting plate system has been developed to offer the appropriate mounting plate thickness for inset doors with face frame cabinets. This eliminates the need to “build up” to match the face frame interspace (**IS**) dimension.

Muebles con aplicación para marco

El sistema de bases **BAR** con grandes espesores ha sido desarrollado para ofrecer el espesor adecuado de la base con aplicaciones internas para marco. Esto elimina la necesidad de “incrementar” para nivelar la dimensión correspondiente a la distancia entre lateral y borde del marco. (**IS**)

Mounting plate part number

Código de la base

- H = 6 mm** - BAR3R69

Accessories Accesorios

S2BX83H9

Steel symmetrical screw cover cap with or without printed logo.
For all 100, 200 and F hinges.
5.000 pcs/box.
Minimum order for personalized cover cap is 10.000 pcs.
Excluded: 165° and 155° opening hinges.

Cubretornillo simétrico de acero con o sin logo serigrafado.
Para todas las bisagras de la serie 100, 200 y F.
5.000 pz/cada caja.
Cantidad mínima para cubretornillo personalizado: 10.000 pz.

S2MX83H9

Steel symmetrical screw cover cap with embossed logo.
For all 100, 200 and F hinges.
5.000 pcs/box.
Minimum order for personalized cover cap is 100.000 pcs.
Excluded: 165° and 155° opening hinges.

Cubretornillo simétrico de acero con logo cuñado.
Para todas las bisagras de la serie 100, 200 y F.
5.000 pz/cada caja.
Cantidad mínima para cubretornillo personalizado: 100.000 pz.

S2XX83A1

Nylon symmetrical screw cover cap with or without printed logo.
For all 100, 200 and F hinges.
Available in white, gray and black. 5.000 pcs/box.
Minimum order for personalized cover cap is 10.000 pcs. Excluded: 165° and 155° opening hinges.

Cubretornillo simétrico de nylon con o sin logo serigrafado.
Para todas las bisagras de la serie 100, 200 y F.
5.000 pz/cada caja. Cantidad mínima para cubretornillo personalizado: 10.000 pz.

SSXX83

Nylon asymmetrical screw cover cap with or without printed logo.
For all S series hinges. Available in beige and gray. 5.000 pcs/box.
Minimum order for personalized cover cap is 10.000 pcs.
For further information please consult our technical support department.

Cubretornillo asimétrico de nylon con o sin logo serigrafado.
Para todas las bisagras de la serie S.
Disponible en beige y gris.
5.000 pz/cada caja.
Cantidad mínima para cubretornillo personalizado: 10.000 pz.

Push - self opening hinge system

Sistema Push de bisagras para la abertura automática de puertas

Push

Push - Self opening door system allows for easy and complete opening of cabinet and furniture doors by lightly pressing on the door itself. Manufacturers will be able to implement the use of Push into the design of contemporary units free of decorative hardware.

Push - Un sistema de abertura automática que permite una abertura fácil y completa de puertas, tan solo ejerciendo una ligera presión a la puerta misma. Los productores podrán implementar el uso de Push en el design de elementos modernos faltos de accesorios decorativos.

The Push system is composed of three components cooperating to swing the door open automatically:

- 1) Multiple self opening hinges**
- 2) One latch**
- 3) One catch**

El sistema Push está compuesto de 3 componentes que permiten la abertura suave y automática de la puerta:

- 1) varios tipos de bisagras con abertura automática**
- 2) Un pulsador**
- 3) Un freno**

To select the correct number of hinges please refer to the chart on page 4 of this catalog.

Ver la tabla a página 4 del catálogo para seleccionar el número correcto de bisagras.

“PUSH has been designed to function without the need of finger pulls (i.e. back bevel doors, routed finger pulls, etc.) and decorative hardware such as pulls, knobs, etc.

Forcing the door open could damage the push mechanism.”

“PUSH ha sido proyectado para funcionar en puertas sin tiradores, pomos o otros accesorios decorativos, en puertas molduradas o con bisel sobre todos los lados.

Forzar la puerta para abrirla podría dañar el mecanismo Push”.

Technical information on the adjustable Push

The adjustable Push consists of a release device (latch) and a screw-fixed adapter which has been developed to improve the locating action of the system. It now has a depth adjustment series of -1 mm to + 2.5 mm which is controlled by a small adjuster screw located at the back of the adapter. In addition, the adapter has a lateral adjustment of ± 2 mm series. This is achieved by loosening the two fixing screws and adjusting the position of the adapter using the elongated holes. Finally, the screws must be retightened.

Informaciones técnicas relativas al PUSH regulable.

El Push regulable compuesto de pulsador y adaptador de atornillar ha sido estudiado para resolver los problemas de enganche entre pulsador y freno. Para regularlo frontalmente (desde -1 hasta + 2.5 mm) es necesario actuar sobre la rueda pequeña colocada detrás del adaptador. Aflojando los dos tornillos de fijación es posible regular el Push lateralmente de ± 2 mm. Los agujeros ovales permiten el desplazamiento del adaptador en los dos sentidos. Una vez terminada la operación, los tornillos tienen que ser nuevamente apretados.

Release device application
Aplicación del pulsador

Release device application with adapter (DP82xxBR) without assembly stop devices.

Insert the release device frontally into the adapter.
 Place the adapter to the top, the side or the base panel of the cabinet, using the drilling value of 8+16 mm for final positioning.

***Release device application with spacer for inset door (DP82SN_R + SP44XX_).**

For inset door it is essential to use the spacer SP44XX_ .

Aplicación del pulsador con adaptador (DP82xxBR) sin topes de montaje.

Insertar frontalmente el pulsador en el adaptador.
 Fijar el adaptador al techo, al lateral o a la base del mueble, considerando el valor de taladro 8+16 mm para el correcto posicionamiento.

***Aplicación del pulsador con distanciador para puertas internas (DP82SN_R y SP44XX_)**

En el caso de puertas internas, es necesario aplicar el distanciador SP44XX_ .

Release device application with adapter (DP83xxBR) without assembly stop devices.

Insert the release device into the adapter.
 Attach the adapter to the top, the side or the base panel of the cabinet, using the drilling value of 8+32 mm for accurate positioning.

Aplicación del pulsador con adaptador (DP83xxBR) sin topes de montaje.

Insertar frontalmente el pulsador en el adaptador.
 Fijar el adaptador al techo, al lateral o a la base del mueble, considerando el valor de taladro 8+32 mm para el correcto posicionamiento.

Release device application with adapter (DP84SN_R) with assembly stop devices.

Insert the release device into the adapter.
 Attach the adapter to the top, the side or base panel of the cabinet, using the assembly stop devices for accurate positioning.

Aplicación del pulsador con adaptador (DP84SN_R) con topes de montaje.

Insertar el pulsador en el adaptador.
 Fijar el adaptador al techo, al lateral o a la base del mueble, utilizando los topes de montaje para el correcto posicionamiento.

Push • Release device application**Push • Aplicación del pulsador****Application of the release device to be recessed.**

Drill a hole \varnothing 10 mm and min. 40 mm deep in the top, side or base panel of the cabinet.

Insert the release device into the hole.

Aplicación del pulsador de encajar.

Taladrar un agujero de 10 mm de diámetro y por lo menos de 40 mm de profundidad en el techo, lateral o base del mueble.

Insertar el pulsador en el agujero del mueble.

1 - Retaining catch with adhesive.

Apply the retaining catch to the magnetic release device. Refer to Figure 1 below. Remove the protective covering from the adhesive and center the catch on the release device. Close the door and apply firm pressure so that the retaining catch will then be correctly positioned on the door. Reopen the door and again apply pressure to the catch to secure the bond.

Attention:

For a correct application and to insure optimum performance, we suggest that you carefully follow the guidelines listed below.

- 1 - Clean and degrease the door surface where the retaining catch is to be installed.
- 2 - Remove the protective covering from the adhesive
- 3 - Place the retaining catch in position, while in an environment where the temperature is 50° F or above. Apply firm pressure for 10-15 seconds after which the catch is suitable for use. Maximum bond is attained in 24 hrs.

1

1 - Contrapulsador con adhesivo.

Aplicar el contrapulsador al pulsador magnético. Quitar la protección de la parte adhesiva. Cerrar la puerta. El contrapulsador adhesivo está así posicionado sobre la puerta. Reabrir la puerta y comprimir fuerte el contrapulsador para hacerlo adherir correctamente.

Atención:

Para una correcta aplicación, al fin de asegurar una fijación óptima en el tiempo, se aconseja de atenderse a las siguientes indicaciones:

- 1 - Limpiar y desengrasar la superficie de la puerta donde será aplicada la plaquita;
- 2 - Quitar la protección de la parte adhesiva;
- 3 - Aplicar la plaquita en ambiente con temperatura $\geq 10^\circ$ y manteniendo una presión por unos 10, 15 segundos.

Después de pocos segundos de la aplicación, la plaquita será idónea al uso. Después de 24 horas se consigue la fijación máxima.

2 - Retaining catch to be inserted.

Apply and center the retaining catch on the magnetic release device. Refer to Figure 2 below. Close the door, which in turn, will create an indentation in the door marking the location where the catch is to be inserted. Using a small hammer, carefully tap in the catch using the indentation as the locating point for positioning. It is then ready for immediate use.

2

2 - Contrapulsador de insertar.

Aplicar el contrapulsador al pulsador magnético. Cerrar la puerta. La punta del contrapulsador indicará donde insertarlo sucesivamente. Reabrir la puerta e insertar a presión el contrapulsador.

The above values are calculated on the assumption that the doors have square edges. They are reduced if the doors have radiused edges.

Los valores mencionados han sido calculados considerando que las puertas tengan esquinas vivas. Estos disminuyen si las puertas tienen esquinas redondeadas.

Projection of the door

Projection of the door from the cabinet side at the maximum opening. The figures are based on a straight arm hinge, H=0 mm thickness of mounting plate and K value = 3 mm.

Retroceso de la puerta

Retroceso de la puerta respecto al lateral en posición de máxima abertura. El valor indicado es resaltado con bisagra codo 0, altura base H=0 y valor K=3.

Titanium finish Acabado **Titanium**

The Titanium finish perfectly integrates the hinge into the design of the cabinet conveying a sensation of warmth while at the same time, incorporating modern functionality.

The color, new and different compared to the traditional nickel-plated finishes, is less invasive and has a muted sheen. The Titanium reflections make the hinge ideal in combination with darker interiors and with the numerous shades of exotic wood finishes used in contemporary cabinetry.

Corrosion resistance is greatly enhanced compared to the traditional nickel-plated finishes.

In keeping with today's trends, this elegant Titanium finish is now available on both the standard hinge series as well as the Silencia+ soft close products.

El acabado de titanio integra perfectamente la bisagra en el diseño del mueble, aportando una apariencia cálida e incorporando al mismo tiempo una moderna funcionalidad.

El color, nuevo y distinto respecto a los tradicionales acabados bruñidos y niquelados, es menos invasivo y brillante. Los reflejos color titanio hacen esta bisagra ideal en combinación con interiores oscuros y las múltiples tonalidades de acabados exóticos de madera utilizados en la ebanistería contemporánea.

La resistencia a la corrosión está considerablemente aumentada respecto al tradicional acabado niquel.

Siguiendo las tendencias actuales, este elegante acabado Titanium ahora está disponible tanto en las series de bisagras estándares como en los productos Silencia+ con cierre amortiguado.
